Solution Requirements

Date	7 July 2026
Team ID	XXXX
Project Name	Smart Lender
Maximum Marks	4 Marks

Define Functional and Non-Functional Requirements:

Step 1: Functional Requirements (FR)

S.No	Requirement Category	Requirement Description	Priority (High/Medium/Low)
1	Authentication	Users can securely access the application and submit details for prediction.	Medium
2	Authorization levels	System integrates with Flask web application and IBM Cloud deployment services	Medium
3	External interfaces	The system accepts applicant details, processes data, and generates prediction results.	High

4	Transactions processing	The system accepts applicant details, processes data, and generates prediction results.	High
5	Reporting	The system displays approval/rejection results and prediction summaries.	Medium
6	Business rules, etc.	Approval depends on income, employment status, education, and credit history.	High
7	Compliance to laws or regulations	Applicant data must be stored and processed securely according to privacy guidelines.	Medium
8	*Other*	The system supports real-time credit card approval prediction using machine learning models.	Medium

Step 2: Non-Functional Requirements (NFR)

S.No	**NFR Category**	**Requirement Description**	**Target Metric / Acceptance Criteria**

1	Performance & Speed	The prediction process should be fast and responsive.	Prediction generated within 2 seconds
2	Scalability	The system should support multiple users simultaneously.	Supports up to 100 concurrent users
3	Security & Data Privacy	Applicant information should be protected from unauthorized access.	Secure data storage and encrypted communication
4	Reliability & Availability	The application should be available whenever users access it.	99% uptime
5	Usability & Accessibility	The interface should be simple and easy to use.	User-friendly web interface
6	*Other*	The system should be maintainable and portable across different platforms.	Compatible with Windows, Linux, and macOS
