Project Name	SmartLender AI - Loan Prediction
Submission Stage	1. Brainstorming & Ideation

User Empathy Analysis

Analysis of what the typical loan applicant says, thinks, does, and feels during the application cycle.

Says

Why does it take so long to find out if I am eligible? I wish they explained the exact rejection reasons rather than showing a generic error screen.

Thinks

Will my \$4,500 monthly income satisfy the debt-to-income (DTI) requirements? How does my Property_Area affect my credit rating?

Does

Enters demographic and asset properties into form sliders. Toggles between light and dark visual themes to read validation checks.

Feels

Anxious about the rigid veto flags but relieved by the fast real-time stepped status indicators.
